

# THREAT

When will YOU be attacked via the mail?

Ricin • Anthrax • Ebola • Hantavirus  
Smallpox • Other hazardous bio-pathogens

# COST

Disruption of Operations

- Evacuation of facility due to contamination
- HAZMAT response
- Economic loss
- Severe health risks
- Loss of employee morale due to fear
- Possible loss of facility

# CONTROL

ELIMINATE CATASTROPHIC CONSEQUENCES  
WITH THE  
**SNIPER MAIL DECONTAMINATION SYSTEM**

- Microwave energy penetrates deep into the mail to violently vibrate and break pathogenic DNA of bio-pathogens
- NASA-developed heater and insulation chamber
- Chamber is maintained in a constant vacuum for stability of energies and prevention of pathogen or hazardous substance release into the environment
- No special certifications needed to operate. One brief, simple training session for personnel is all that is needed to be ready to fully operate with only 110V power.
